Privacy Impact Score  
**A**

**Privacy Impact Score** is a score reflecting overall cookie-related impact of the website relative to other websites, primarily taking into account the number of third-party domains it reports to and number of persistent cookies it sets. See [Privacy Impact Score](#) article for more details.

Third-party domains <b>0</b>	Persistent cookies <b>0</b>	Session cookies <b>0</b>
---------------------------------	--------------------------------	-----------------------------

**Third-party domains** is the count of organisations allowed by the webmaster to trace your across the site. These cookies may be set for various purposes, like tracking ads displayed on the website, collection of statistics, targeted advertising etc. This website allows 0 other websites to track your activity.

**Persistent cookies** are the cookies that are preserved through browser shutdowns. This means, even if you close this page today and ever return there in future, the website will know you're a returning visitor. This may be used for "remember me" features, as well as persistent user tracking. These cookies, especially if set by third party organisations, are powerful tool for monitoring your activities across all the websites you visit. This website sets 0 persistent cookies with average life-time of 0 days and longest 0 days.

**Session cookies** are cleared when you close your browser and allow the website to identify user's state — such as logged-in users. They are mostly considered harmless because they cannot be used for long-term user tracking. This site sets 0 session cookies.
